

Una vez adquirido el Modulo Lunar

The diagram illustrates the signal flow from the guitar through various effects to the amp. The guitar signal splits into two paths: one through a Distortion and Wah pedal, followed by a Compressor; the other path goes directly to a Modulo Lunar pedal. The outputs of the Modulo Lunar and the Wah/Compressor paths converge before reaching the Amp. The Amp's output then passes through a Reverb and a Delay pedal before finally reaching the speaker.

**Sound Settings**

Two circular control panels are shown, labeled 'classic' and 'steps'. Each panel has a central dial with 'RES' at the bottom and 'LFO SYM' at the top. The left panel has 'MODE' at the top right, with 'descending' and 'ascending' options. The right panel also has 'MODE' at the top right, with '4', '5', '6', and '7' options. Both panels have 'manual' and 'steps' labels at the top right.

Modelo 2012 - MOD-5  
True Bypass ([www.dedalofx.com.ar/truebypass](http://www.dedalofx.com.ar/truebypass))  
Impedancia del efecto: 600Kohm  
Alimentación por fuente: 9v DC Negativo al centro (mínimo 100mA)  
Alimentación por batería: Alcalina 9v  
Consumo: 38mA en 9v DC  
Duración de batería: 3hs de uso continuo  
Dimensiones: 12cm x 9,4cm x 5,4cm  
Peso: 475gr

Model 2012 - MOD-5  
True Bypass (<a href="http://www.dedalofx.com.ar>truebypass)  
Input impedance: 600Kohm  
Power supply: DC 9v center negative (minimum 100mA)  
Battery power: 9v Alkaline  
Power consumption: 38mA at 9v DC  
Battery life: 3hrs continuous use  
Dimensions: 12cm x 9.4cm x 5.4cm  
MFR: 120Hz - 15KHz

1

- To place a battery, remove the lid by removing screws.
- Use only regulated 9v dc adapter, with negative center polarity. In no way should be connected to 220V or adapters of other kinds.
- Avoid dropping, hitting or exposing the pedal to extremes of humidity or temperature.
- Disconnect the input when the pedal is not in use to avoid battery drain.
- Remove the battery if you don't plan to use the pedal for a long time.
- To clean the pedal, use a dry cloth.
- Do not remove the protective silicone legs, they protect the pedal from shocks and external pressures.
